Index Overview

Description

The Invesco Peak II Index (“the Index”) is a multi-asset, target volatility index. The Index combines equity exposure via Invesco US Quality Index with a focus on high-quality large- and mid-cap companies along with dynamic bond exposure that adjusts between short and intermediate US Treasury bond futures trackers as interest rate conditions change. The index aims to maintain a 7.5% volatility level by utilizing Salt Financial's truVol methodology.

Index Universe

The Invesco Peak II Index is composed of the following:

Ticker	Name
IUUQ	Invesco US Quality Index
SMR10YUS	Solactive Munich Re FIVE US 10Y T-Note Futures Index
SMR2YUS	Solactive Munich Re FIVE US 2Y T-Note Futures Index

SMR10YUS Index and the SMR2YUS Index will henceforth be referred to as '10Y' and '2Y', respectively. 10Y, 2Y, Cash, or any combination of the three are collectively referred to as "Fixed Income".

Security Selection

The initial Fixed Income weight either will be comprised entirely of 10Y, 2Y, Cash, or a blend of 10Y, 2Y, Cash. To determine the allocation, 10Y and 2Y percentage change is measured against its historical levels.

Details on the security selection criteria for the Invesco US Quality Index can be found in its methodology document at www.invescoindexing.com.

Security Weighting

The proportional weightings for the Equity and Fixed Income components are established using the following:

The initial weight for Equity exposure is determined by a long-term risk budgeting approach, setting the preliminary Equity allocation at one-third of the ratio of long-term (LT) to short-term (ST) equity volatility. The remainder is allocated to Fixed Income, which is dynamically adjusted across 10-Year and 2-Year yield instruments, informed by real-time market yield assessments. Fixed Income exposure may thus be allocated selectively across the 10-Year and 2-Year yields, independently or in combination, in response to yield curve trends and market conditions.

This risk-based allocation is subsequently adjusted to meet the initial portfolio volatility target, incorporating both Equity and Fixed Income (10-Year and 2-Year) exposures. To align with market volatility and refine the Equity weighting, truVol® Risk Scalars are applied, leveraging proprietary volatility insights from Salt Financial LLC. Access to truVol data is strictly limited to authorized individuals, as this proprietary information is protected as a trade secret.

Underlying Data	Notation
truVol SPY Equity Variance	\hat{y}_t^{SPY}
truVol Smoothed Risk Scalar	$SmoothedRiskScalar_t$
truVol Risk Model	$RiskModel_t$

Using the initial weightings for Equity and Fixed Income, the combined multi-asset portfolio volatility is then calculated by integrating truVol data within the variance-covariance matrix. The weighting proportions between Equity and Fixed Income are preserved; however, the aggregate portfolio weight is scaled up or down to achieve a target volatility of 7.5% for the Index. The maximum combined allocation for Equity and Fixed Income is capped at 200%.

All security weighting criteria are applied as of the Reference Date for each Index update.

Index Details

Index Calculation

The Index Value, denoted as $Index_0 = 1000$, is established as of the Index Start Date. Subsequently, on each specified Index Calculation Day, the Index Value will be calculated using the following formula:

$$Index_t = Index_{t-1} + \sum_{i \in \{IIUQ, 10Y, 2Y\}} Units_{t-1}^i * (ERL_t^i - ERL_{t-1}^i) - IndexCosts_t$$

Where $IndexCosts_t$ are calculated as follows, subject to whether $t=1$ or $t>1$.

$$IndexCosts_t = \begin{cases} HoldingCost_t + IndexDecrement_t, & t = 1 \\ TransactionCost_t + HoldingCost_t + IndexDecrement_t, & t > 1 \end{cases}$$

$$TransactionCost_t = \sum_{i \in \{IIUQ, 10Y, 2Y\}} Abs(Units_{t-1}^i - Units_{t-2}^i) * TC^i * ERL_{t-1}^i$$

$$HoldingCost_t = \frac{days(t, t-1)}{360} \sum_{i \in \{IIUQ, 10Y, 2Y\}} Abs(Units_{t-1}^i) * HC^i * ERL_{t-1}^i$$

$$IndexDecrement_t = Index_{t-1} * \frac{days(t, t-1)}{360} * 0.005$$

$$Units_t^i = \frac{FinalWeight_{t-1}^i * Index_{t-1}}{ERL_{t-1}^i}$$

$$ERL_t^i = ERL_{t-1}^i * (1 + ER_t^i)$$

$$ER_t^i = \begin{cases} R_t^i - \frac{RFR_{t-1}}{360} * days(t, t-1), & i \in \{IIUQ\} \\ R_t^i, & else \end{cases}$$

$$R_t^i = \frac{(Close_t^i + D_{t,ex}^i)}{(Close_{t-1}^i + D_{t-1,ex}^i)} - 1 \quad i \in \{IIUQ\}$$

RFR is the Fed fund rate

And with the respective transaction and holding costs defined as

Component (i)	TC^i	HC^i
IIUQ	0.0002	0.0050
10Y	0.0003	0.0015
2Y	0.0002	0.0010

History

The Index was launched on November 1, 2024. History is available for the Index since its base date of December 31, 2003. The base value of the Index is 1000.

Updates

The Index is rebalanced daily.

Index Rebalance

During the daily Index Rebalance, the Index Universe is selected, Index constituents are refreshed, and the new Index constituents are weighted according to the security weighting methodology described in the Index Overview section.

Index Key Dates

The key dates are as follows. The Index Review Team (see Governance section) may change these dates for reasons including market holidays. Any such changes will be publicly announced with as much advance notice as possible under the circumstances. All events take place after the close.

Event	Day	Description
Reference Date	Each business day	Data is captured for Index construction
Effective Date	Each business day	Rebalanced Index weights are finalized

Index Calculation and the Role of the Calculation Agent

The calculation agent for the Index (“the Calculator”) is Invesco Indexing LLC. The Calculator evaluates the closing value of the Index, updates the Index each business day based on constituent selections and weightings determined by Invesco Indexing LLC.

Calculator Input Data Used and Hierarchy of Input Data

The Index is calculated using closing prices or last transacted prices of underlying constituent securities from exchanges or exchange equivalents. Should this type of data be unavailable, the Index may be calculated using quotes or evaluated data or, in case when continued availability of transacted security prices from security exchanges is suspended, the Calculator reserves the right to exercise a judgement call, including carrying forward the latest available closing price.

Use of Discretion and/or Expert Judgement

No discretion or expert judgement is exercised by Invesco Indexing LLC in the determination of daily index pricing. Rules-based index methodologies, which cover index construction, maintenance and calculation, provide that discretion is not used in the daily pricing of the indexes except in unusual cases not effectively addressed by the methodology, which could be exercised by the Calculator. These include, but may not be limited to:

- Corporate events not previously encountered,
- Structural changes to the underlying markets,
- Operational issues at security exchanges,
- Geo-political events,
- Technological problems / failures, or
- Natural disaster or other business continuity process-related event.

In such circumstances, the calculating agent will inform Invesco Indexing LLC of any discretion being used.

Potential Limitations of the Methodology and Benchmark Calculation

The potential limitations of daily Index calculation include circumstances where the prices of constituent elements of the Index are not available, either because there are insufficient participants or because the exchange(s) / exchange equivalent(s) suffers an unexpected outage or closure or Invesco and/or the Calculator is denied permission to use such data for determining the Index. In such circumstances an announcement will be made to notify clients, including whether the Index will not be published or delayed in publication.

Corporate Events

The securities in the IIUQ are monitored every day by the calculation agent with respect to changes in total shares outstanding arising from corporate events.

The Calculator identifies and adjusts for corporate events in the underlying Invesco US Quality Index. For details on the corporate event policy for the Invesco US Quality Index, please see its index methodology document at www.InvescoIndexing.com.

Index Policy

All Index constituents are evaluated daily for data needed to calculate Index levels and returns. The Index follows the general Index policies of the Calculator as described below.

Holiday Schedule

The Index is calculated daily, throughout the calendar year. The only days the Index is not calculated are on days when any exchanges on which the Index's constituents are listed are officially closed.

Governance

The Index is managed by the Index Review Team (IRT). The IRT consists solely of members of Invesco Indexing. The IRT meets at least annually to review and revise Index methodology described in this document as appropriate. The IRT meets at least annually to review additions and deletions to the Index. All daily changes to the Index are subject to the approval of the IRT, and the IRT may make adjustments to the Index at its discretion when such changes are reasonable.

Index Methodology Update and Cessation Policy

Invesco Indexing periodically, at least annually, reviews each Index and its accompanying methodology, in addition to periodic rebalancing (if applicable), in an effort to ensure the Index continues to accurately represent that portion of the market it was originally intended to, and delivers the outcomes one would expect from the Index's exposures.

The procedures for the internal review of the methodologies, changes to the methodologies and procedures performed when the Index administered is ceasing publication are described in detail in the Changes to Benchmark Methodology and Cessation Policy.

Return Types and Tickers

The Calculator computes one return type for the Index on a daily basis: excess return. The excess return reflects the contribution from IIUQ and Fixed Income

Return Type	Ticker
Excess Return	IIPEAK2

Index Information and Data Dissemination

Data Vendors

Daily Index levels for all return types are available from major quote vendors and at www.InvescoIndexing.com.

FTP

Daily constituent data and Index level data are available via the Invesco Indexing secure FTP site for Index subscribers. Please contact Invesco Indexing customer service at IndexSupport@invesco.com for more information.

File Types

The Invesco Indexing secure FTP site for Index subscribers will distribute the standard overnight Index files from the Calculator. These include:

File Description	File Extension
Index Levels	.CSV
Constituent Weights	.CSV

The data on these files is provided directly by the Calculator, and no descriptive information contained in these files is used by Invesco Indexing at any stage of the Index creation process. In addition, security characteristics are available upon request. The characteristics are created by Invesco Indexing periodically and are updated as necessary. The characteristics data contribute to the creation of the Index or otherwise help to describe the Index constituents. Please contact Invesco Indexing customer service at IndexSupport@invesco.com for more information.

Website

Index information is available on the Invesco Indexing website at www.InvescoIndexing.com.

Definitions of Key Terms

Terms used in this document but not otherwise defined are defined in the following table. Definitions, that are marked with a (*) are sourced from Regulation (EU) 2016/1011 (“EU Benchmark Regulation”) Article 3. Definitions, that are marked with a (**) are sourced from IOSCO Principles for Financial Benchmarks¹.

Term	Definition
Administrator *	‘Administrator’ means a natural or legal person that has control over the provision of a benchmark;
Benchmark *	‘Benchmark’ means any index by reference to which the amount payable under a financial instrument or a financial contract, or the value of a financial instrument, is determined, or an index that is used to measure the performance of an investment fund with the purpose of tracking the return of such index or of defining the asset allocation of a portfolio or of computing the performance fees;
Calculation Agent **	A legal entity with delegated responsibility for determining a Benchmark through the application of a formula or other method of calculating the information or expressions of opinions provided for that purpose, in accordance with the Methodology set out by the Administrator;
Contribution of Input Data *	‘Contribution of input data’ means providing any input data not readily available to an administrator, or to another person for the purposes of passing to an administrator, that is required in connection with the determination of a benchmark, and is provided for that purpose.
Corporate Action	A Corporate Action occurs when there is a change to a company’s capital structure. Unlike Corporate Events, Corporate Actions have a prescribed ex-date. The share price will be subject to an adjustment on the ex-date and Invesco Indexing and/or the calculating agent will adjust the index to counteract the effect that the price change would otherwise have on the index. Examples of corporate actions include rights or entitlement issues, consolidations, stock splits and capital repayments.
Expert Judgment *	‘Expert judgement’ means the exercise of discretion by an administrator or a contributor with respect to the use of data in determining a benchmark, including extrapolating values from prior or related transactions, adjusting values for factors that might influence the quality of data such as market events or impairment of a buyer or seller’s credit quality, and weighting firm bids or offers greater than a particular concluded transaction;
Index*	‘Index’ means any figure: (a) that is published or made available to the public; (b) that is regularly determined: (i) entirely or partially by the application of a formula or any other method of calculation, or by an assessment; and (ii) on the basis of the value of one or more underlying assets or prices, including estimated prices, actual or estimated interest rates, quotes and committed quotes, or other values or surveys;
Input Data *	‘Input data’ means the data in respect of the value of one or more underlying assets, or prices, including estimated prices, quotes, committed quotes or other values, used by an administrator to determine a benchmark;
Material Change to Methodology	In determining whether a change to an Index is material, the following factors shall be taken into account: <ul style="list-style-type: none"> • Economic impact of the change; • Whether the change affects the original purpose of the Index.
Methodology **	The written rules and procedures according to which information is collected and the Benchmark is determined;
Rebalance	The regular process (typically quarterly, semi-annually or annually) in which the eligibility and weights of constituent elements of indexes are reassessed;
Subscriber **	A person or entity that purchases Benchmark determination services from an Administrator;
Transaction Data *	‘Transaction data’ means observable prices, rates, indices or values representing transactions between unaffiliated counterparties in an active market subject to competitive supply and demand forces;

WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Important Information for Munich Re

Solactive AG ("Solactive") is the licensor of the Solactive

Munich Re FIVE US 2Y T-Note Futures Index and the Solactive Munich Re FIVE US 10Y T-Note Futures Index (each, an "Index"). The financial instruments that are based on an Index are not sponsored, endorsed, promoted or sold by Solactive in any way and Solactive makes no express or implied representation, guarantee or assurance with regard to: (a) the advisability in investing in the financial instruments; (b) the quality, accuracy and/or completeness of an Index; and/or (c) the results obtained or to be obtained by any person or entity from the use of an Index. Solactive does not guarantee the accuracy and/or the completeness of an Index and shall not have any liability for any errors or omissions with respect thereto. Notwithstanding Solactive's obligations to its licensees, Solactive reserves the right to change the

methods of calculation or publication with respect to an Index and Solactive shall not be liable for any miscalculation of or any incorrect, delayed or interrupted publication with respect to an Index. Solactive shall not be liable for any damages, including, without limitation, any loss of profits or business, or any special, incidental, punitive, indirect or consequential damages suffered or incurred as a result of the use (or inability to use) of an Index

The information provided is for informational purposes only and should not be construed as an offer to buy or sell any financial instruments, or a recommendation for any security or fund interest. Invesco Indexing LLC is not an investment adviser or fiduciary and makes no representation regarding the advisability of investing in any security or strategy. There can be no assurance that an investment strategy based on the Invesco Indexes will be successful.

Indexes are unmanaged and it is not possible to invest directly in an Index. Exposure to an asset class or trading strategy represented by an Index is only available through investable instruments (if any) based on that Index. Invesco Indexing LLC does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, derivative or other security, financial product or trading strategy that is based on, linked to or seeks to track the performance of any Invesco Indexing LLC Index.
